To Whom It May Concern:

Miss Katie Worthington

Miss Worthington has worked for the Dean and Chapter of York as an apprentice carver/mason for the past two years. She came to us from Weymouth college where she gained NVQ levels two and three in stone masonry and architectural carving, a diploma in letter cutting and a distinction in architectural carving.

As part of the Minster workforce she has been involved with major restoration projects including work on the Great West Door and North West Tower; one of the largest and finest examples of gothic restoration this century. She has masoned and carved voussoirs for the North West Door and Great West Door, worked crockets and finials for the North West Tower and carved the lettering on the plaque marking the completion of the Great West Door project, which was unveiled by HRH the Duke of York in June 1998.

Katie has proved to be an honest and skilled worker who is always willing to learn.

If further information is required please contact me at the above address.
